

A multiple drum puller, the Wagner-Smith Equipment Co. **Model T-4DP-115** can be used in a wide range of Transmission stringing applications.

OPERATING FEATURES

- Internally pressure compensated closed-loop hydraulic system, minimizes heat build up of hydraulic fluid while in the tensioning mode.
- The preset desired pulling or tensioning pressure can be easily set.
- Spring applied, hydraulic pressure released safety brake is standard in the main drive line for operator safety.
- All unit operating controls are located at the operator's station, off the ground, for operator safety.
