

The TEMA 104R5 delivers 11,000 lbs. of pulling power. Ideal for underground power & telecom pulls in urban or confined sites; it features a 6' boom for better worksite access, plus remote control & data tracking for safer, smarter operation.

Unit Performance	
Line Tension Rating	11,000 lbs.
Line Speed	180 ft./min.
Speed Under Max Load	39 ft./min.
Standard Features	
Pulling Cable	1/2" X 8 Strand X 3,280'
Controls	Radio control pendant
Engine	Yanmar 36.5HP Final Tier IV
Fuel Capacity	9 gallons (diesel)
Hydraulic Oil	Chevron ATF MD-3
Jacks	(1) speed crank; bumper (2) - manual pin
Towing	
Hitch	3" pintle eye with safety chains
Trailer Plug	6-way connector
Brakes	Electric with breakaway switch
Lighting	DOT, LED, 12VDC
Wheel Chocks	Standard (2)
Dimensions & Weight	
L X W X H	15' 8" X 6' 2" X 7' 10"
Unit Weight	6,220 lbs.
Tongue Weight	800 lbs.
GVWR	8,800 lbs.
GAWR	8,000 lbs.

**Intelligent Features  
for Smarter Ops**

The 104R5's 7" LCD touch-screen gives instant control over pulling force, speed, distance, and runtime, with USB export for easy data tracking and compliance. A 16-foot remote control console enhances safety and workflow by allowing operation from a distance.

**More Reach. More  
Room. Less Risk.**

The puller's 6-foot boom creates critical space between the equipment and the manhole, giving crews the freedom to work safely and efficiently. With the unit set back, there's easier access for ladders, tools, and personnel—reducing clutter and trip hazards at the entry point. The added distance helps streamline cable handling and setup while enhancing visibility and workflow around the vault. It's a small detail that makes a big impact on jobsite performance.

Rental Item #: **30073-10R**
